OVERVIEW

Our team brings strong expertise in mechanical and product design engineering. The team's capabilities span from concept development, design simulation, and detailed CAD modelling to validation and manufacturing-ready documentation, along with design for additive manufacturing.

Our design engineering skill set covers 2D drafting, 3D modelling, reverse engineering, GD&T, complex surface modelling, model checking, and support for all major 3D printing technologies including FDM, SLA, SLS, DMLS, SLM, MJF, Binder Jetting, and other additive manufacturing processes. This experience helps address today's business challenges of reducing design cycles, managing complexity, and improving product quality.

KEY CAPABILITIES

PRODUCT LIFECYCLE SUPPORT

We Provide end-to-end product lifecycle support through a structured three-stage approach, ensuring continuity, quality, and scalability at every phase.

Design & Development

Concept feasibility, CAD design, simulation, optimization, and design for manufacturing and additive manufacturing.

Prototype & Production Support

Rapid prototyping, 3D printing, validation, manufacturing documentation, and production readiness support.

Sustenance & Optimization

Design changes, cost reduction, performance improvement, compliance updates, and lifecycle extension.

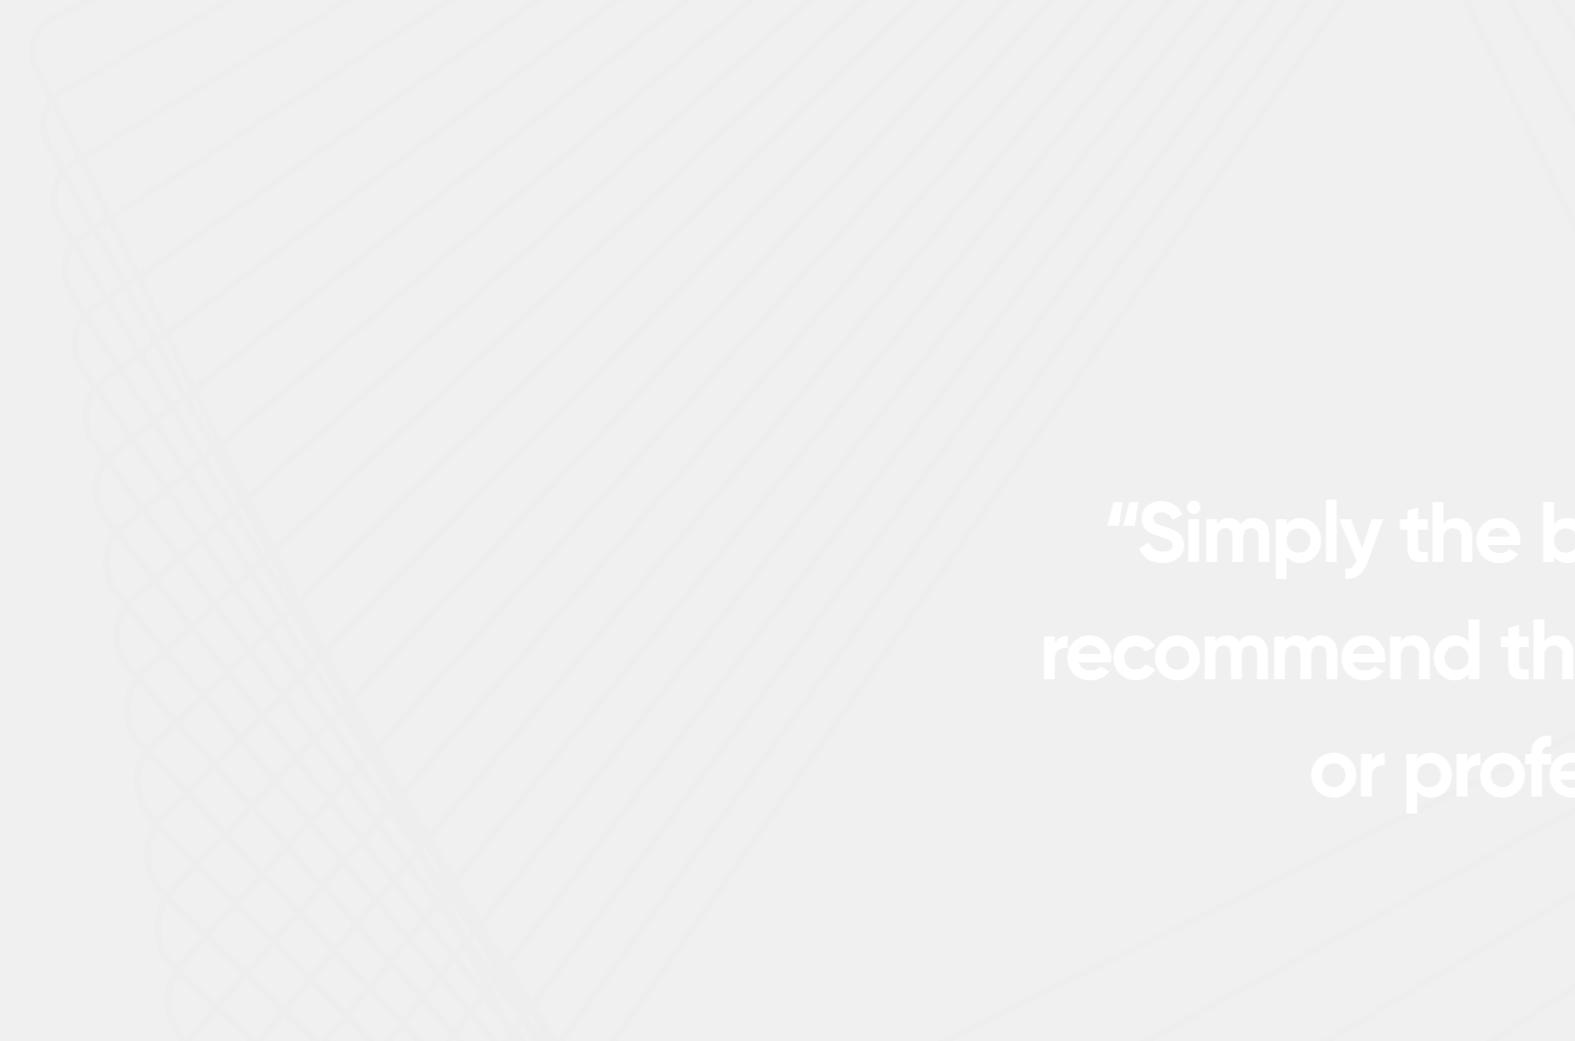

Ready to bring your idea into reality?

With having a team of unique minds, you can easily get ur imagined idea into reality, without any hassle. Build your next landing project with us.
